

FOOD SAFETY POLICY STATEMENT

Giloil Company Limited is committed to manufacturing of high quality and safe edible vegetable oils and fat that meets our customers' and other stakeholders' requirements.

We are committed to maintain adequate internal as well as external communication of our policy and food safety issues at all levels of the organization and in the food chain.

We shall ensure that the employees working in the food production departments and related areas have or have been given, through training, the necessary knowledge and competencies in the food chain with particular attention to food safety.

We shall endeavour to continually maintain and improve our food safety management system that meets statutory, regulatory and FSSC 22000 requirements all the time.

We shall establish Food Safety Team within the plant and make sure they are trained to identify and assess food safety hazards. Control measures will be put in place to eliminate or reduce the identified hazards.

Control points considered as critical will be managed within a HACCP (Hazard Analysis & Critical Control Point) program. Control plans will be put in place to enable management to monitor these areas and activities.

In addition, the plant will implement and maintain Good Manufacturing Practices to ensure the existence of internal conditions, which are consistent with food safety

The food safety objectives that support this policy are well elaborated in departmental level.

The Food Safety System shall be continuously reviewed to ensure its continuing suitability and effectiveness.

VIKRAM GILL
